4. Satisfaction of completers (Component A.4.2)

Completer Satisfaction

The Completer Satisfaction Survey is being designed as part of a Phase-In Plan included in the SSR Addendum. A questionnaire included in the SSR referenced completers as students who were graduating candidates for the 2020 academic year. It came to the attention of the GSE that there was no instrument available to assess the completers (students who have already graduated and are working and/or licensed in their specialty). It also came to our attention that only four programs were being reviewed for accreditation purposes: EMLE, CURT, COUN, and SCPS. Based on this information, a Phase-In Plan was put in place to design a more specific survey and begin collecting data.

competence in the classroom, and complete impact on P-12 student learning.		Third cohort December 2021	& monitor replies.	

It is important to state that first cohort data collection originally scheduled for March 2021 has not been met. The survey has yet to be approved by the IRB. Current pandemic related situations have complicated the process.
